CARBIDE RIPPA BLADES

	CARBIDE RIPPA BLADE: DU-RB		DESCRIPTION: A unique welded tip carbide saw blade for use on petrol driven saws and angle grinders with a reduced noise and vibration centre.
	SEGMENT HEIGHT:	VARIABLE	APPLICATIONS: MULTI-USE Tree roots, soil, groundwork, railway sleepers, wood boards and planks, fence panels, thin sheet metal, decking, tar, nails, screws, flashing, rubber, plastics, flat roofing, abrasive blocks and much more...
	DRY/WET:	BOTH	
	SEGMENT TYPE:	CARBIDE CLUSTERS	
	TOOL:	PETROL DRIVEN SAWS AND ANGLE GRINDERS	
CORE PROTECTION:	SILENCED		

Bi-Directional - The blade can be run in either direction with no need to re-sharpen - simply turn the blade around again and again.

This is the ultimate multi purpose blade. Ideal for the following professionals:

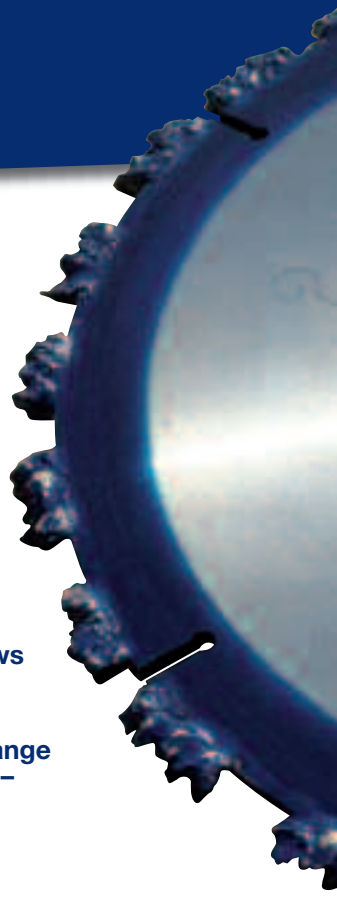

- Tree Surgeons and Landscapers
- Roofing Contractors
- Decking Contractors
- Sheet Metal Workers
- Farmers
- Council Departments
- Agricultural Contractors
- Forestry Commission
- Demolition Contractors
- Railway Contractors
- Window Fitters

The Rippa blade is a perfect replacement for chainsaws. The Rippa blade will not 'clog' itself or the petrol saw that drives it. It can be used in applications that chainsaws are not allowed to be. Perfect for use in conjunction with stump grinders.

The RIPPA blade can be used on a huge range of different materials – one after the other – with minimal segment clean-up after use even on materials such as rubber.

CARBIDE RIPPA BLADE: AVAILABLE IN THE FOLLOWING SIZES

(5") 125 x 22.2	(9") 230 x 22.2	(12") 300 x 20.0	(14") 350 x 20.0	(14") 350 x 25.4
-----------------	-----------------	------------------	------------------	------------------

THE RIPPA BLADE HAS SO MANY APPLICATIONS...

WE HAVEN'T DISCOVERED THEM ALL YET!
